1. GENERAL INFORMATION

A. Specific Requirements.

The Oscar™ video game is a one or two player video game conversion kit. It is intended to be installed into an existing video game cabinet and comes with all the necessary components to make the converted game look and play like a new dedicated game!

The game to be converted must meet the following requirements:

MONITOR: Horizontal, RGB, negative Composite Sync input.

POWER SUPPLY: + 5 vdc @ 5 amperes, and + 12 vdc @ 1 ampere (minimum)

B. List of Materials.

QTY	DESCRIPTION	PART NUMBER
1	PCB, OSCAR	510-0122-00
1	MAIN HARNESS, JAMMA, KIT	036-0158-01
1	JOYSTICK, 4/8 WAY, MONROE	450-0009-00
6	PUSHBUTTON ASSY, YELLOW	350-0016-04
1	CONTROL PANEL OVERLAY, GENERIC	800-0030-00
1	UNDERLAY CARD, OSCAR	810-0027-00
2	SIDE DECAL, GENERIC	820-0040-00
1	MARQUEE PLEX, OSCAR	830-0035-00
2	LABEL SHEET, OSCAR	406-0091-00
1	FCC WARNING LABEL	406-0003-00
1	MANUAL, INSTALLATION & SERVICE	780-0082-00

C. Warranty Information

Data East USA, Inc., ("Seller"), warrants only to the initial purchaser ("Buyer") of its products that the items listed below are free from defects in material and workmanship under normal use and service for the period specified:

GAME LOGIC PRINTED CIRCUIT BOARD(S)

90 DAYS

No other parts of Seller's products are warranted.

Warranty periods are effective from initial date of shipment from Seller to Buyer. Seller's sole liability shall be, at its option, to repair or replace products which are returned to Seller during the warranty periods specified, provided:

1. Seller is notified promptly upon discovery by Buyer that stated products are defective.
2. Such products are properly packaged and then returned freight pre-paid, to Seller's plant.

This warranty does not apply to any parts damaged during shipment and/or due to improper handling, or due to improper installation or usage, or alteration. In no event shall the Seller be liable for any anticipated profits, loss of profits, loss of use, accidental or consequential damages, or any other losses incurred by the customer in connection with the purchase of a Data East USA, Inc., product.

WARRANTY DISCLAIMER

EXCEPT AS SPECIFICALLY PROVIDED IN A WRITTEN CONTRACT BETWEEN SELLER AND BUYER, THERE ARE NO OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

D. Installation Instructions.

When selecting a game to convert, make sure that the power supply, the monitor, and the coin acceptors are functional. There is nothing more frustrating than installing a conversion kit and having it not operate due to a faulty monitor or power supply. I know...we will all suspect that the new logic pcb is defective, right?

It is mandatory that the cabinet be wired to conform with all National and Local Electric Code requirements before the conversion is attempted. The primary section must have adequate noise filtering on the AC line to prevent unwanted conducted radio frequency interference. 'Adequate' is defined as a filter with both common mode and differential mode filtering and a minimum current capacity of 1 ½ amperes.

According to the FCC and other regulatory agencies, every video game must have be clearly labeled with the Name and Address of the Original Manufacturer, Date of Manufacture (or serial number), Voltage Rating, Current Rating, Suitability for indoor or outdoor use, and Model Number. In addition, the FCC requires that after conversion, the unit must be labeled with a suitable warning stating that radio frequency interference may result from use in a residential area. An acceptable sticker is included in this kit.

IT IS THE RESPONSIBILITY OF THE PERSON PERFORMING THE INSTALLATION TO COMPLY WITH ALL LABELING REQUIREMENTS.

TAKING IT APART

Performing a few simple tasks when preparing a game to be converted can save you much time and effort when you are installing the conversion kit.

Find the wiring diagram of the game to be converted! You will need to identify the required DC power supply output wires and the monitor video and sync wires. Note the color coding of these wires or better yet, label them as to their function. This kit contains a new Main Harness, but you will need to splice it into the existing power supply and video wires.

Remove the existing game harnessing that will not be used in this conversion. NOTE: you are modifying only the secondary (DC from power supply) and I/O (video, speaker, and controls) section of the wiring. DO NOT MODIFY OR REMOVE THE PRIMARY AC WIRING. The primary AC wiring has been designed and built to comply with UL and FCC regulations and must not be altered.

B. Installation Instructions (cont.)

Remove the game pcbs. Remove all exterior decals and repaint the cabinet if necessary. Repair any cabinet damage at this point. Remove the monitor plex (or glass). If your plex has silkscreened artwork on it, you will need to strip it off, or replace the plex with a piece cut to the same size. Using the monitor plex as a template, cut the supplied underlay card to the same size as the plex. **NOTE: Be certain that the opening in the underlay card lines up with the monitor CRT.**

Remove the marquee plex from the game and use it cut the supplied marquee plex down to the correct size. Remove the control panel from the game and remove all controls and graphics from it. **NOTE: Save the Player Start buttons, as they are not supplied in this kit.**

PUTTING IT TOGETHER

Control Panel: This is never any fun, so lets do it first and get it out of the way. Choose a button and joystick layout that fits your control panel size. Refer to figure 1 for suggested panel layouts to see what holes you will need to add or block.

Figure 1

Install the Control Panel Overlay by peeling off the paper backing and carefully laying the overlay down onto the panel. Smooth it out starting in the center and work your way out to the edges, removing all of the trapped air pockets. If possible, cut the edges of the overlay oversize and fold the excess under the panel. Cut out the button and joystick holes. Install the Control Function Labels found on the two sheets of labels supplied in your kit. This game uses the following labels:

1 ea. "1 PLAYER"	2 EA. "FIRE"
1 ea. "2 PLAYERS"	2 EA. "JUMP"
1 OR 2 EA. "OPTION"	1 EA. JOYSTICK PATTERN, 8 WAY

Cover the Control Panel Overlay and Control Function labels with a clear plex to protect the overlay and labels. Install the buttons and joystick at this time. NOTE: This conversion kit does not supply the Player Start buttons. You must use the buttons removed from the control panel in an earlier step. Mount the completed control panel to the cabinet.

Game PCB: Mount the game PCB to a convenient wall of the cabinet using the mounting feet and hardware supplied with the pcb.

Power Supply Wiring: Plug the Main Harness edge connector onto the game PCB's edge connector. Separate the power supply wires and route them through the cabinet to the power supply. Try to keep the length of these wires to a minimum for best results. NOTE: Use a minimum of 2 wires EACH for the +5 Volts and the Ground lines between the power supply and the PCB. Terminate them as required.

WARNING: IMPROPER WIRING MAY DAMAGE THE PCB SET AND VOID YOUR WARRANTY!

Player Control Wiring: Route the pushbutton and joystick wires up to their proper destinations, cut to length, and terminate as required. Refer to the Edge Connector Pin-Out for WIRE COLOR and FUNCTION info.

Monitor Wiring: The game PCB has outputs for Positive Red, Green, Blue, and Negative Composite Sync. If your monitor has separate Horizontal and Vertical sync inputs, hook the Composite sync to the negative Horizontal input. This method will work on most monitors, however some model Electrohome's require that the Composite sync signal be hooked up to both the negative Horizontal and Vertical inputs. Contact your distributor for more information if you are uncertain as to how to hook up the monitor wires.

B. Installation Instructions (cont.)

Coin Counter: The Coin Counter(s) may be the 12 volt or 6 volt type as the PCB utilizes an open collector drive circuit. Hook one coin counter wire to the required voltage (+12v or +5v) and the other wire to the coin counter signal wire from the game PCB.

Graphics: Install the Game Instruction labels onto the Underlay Card, either in the lower portion, or on one side of the picture tube cutout. Install the Underlay Card under a clear monitor plex (or glass). Mount the new Marquee Plex, and install the Side Decals. **NOTE:** Install the FCC Warning label to the upper rear of the cabinet.

THE BIG TEST!

REMOVE THE MAIN HARNESS EDGE CONNECTOR FROM THE GAME PCB!

Apply power to the game. Measure the +5 volts at the edge connector and adjust to +5.15 VDC. Measure the +12 and -5 vdc wire to be certain they are connected properly and are on the correct terminals. Remove power to the game.

RE-CONNECT THE MAIN HARNESS EDGE CONNECTOR!

Apply power to the game once again. The attract mode video should appear on the screen. Adjust the picture size and colors on the monitor to get the optimum appearance. Adjust the Sync and Hold controls on the monitor for a stable picture. Coin it up and give it a try! Test all the controls and sound for proper operation.

Congratulations! You have completed the installation of your new Data East conversion kit! We hope that it gives you many years of successful operation.

2. GAME INFORMATION

A. Game Options.

The game options can be changed via 2 banks of dip-switches on the game PCB. Be certain to remove power to the game when changing settings.

DIP SWITCH 1:

ITEM	ACTION	1	2	3	4	5	6	7	8
COIN	1 COIN = 1 CREDIT:	OFF	OFF						
VS	1 COIN = 2 CREDIT:	ON	OFF						
CREDIT	1 COIN = 3 CREDIT:	OFF	ON						
COIN 1	2 COIN = 1 CREDIT:	ON	ON						
COIN	1 COIN = 1 CREDIT:			OFF	OFF				
VS	1 COIN = 2 CREDIT:			ON	OFF				
CREDIT	1 COIN = 3 CREDIT:			OFF	ON				
COIN 2	2 COIN = 1 CREDIT:			ON	ON				
DEMO FREEZE MODE	NO:					OFF			
1P=STOP, 2P=CONTINUE	YES:					ON			
ATTRACT MODE SOUND	YES:						OFF		
	NO:						ON		
FLIP SCREEN	NORMAL:							OFF	
	REVERSE:							ON	
CABINET TYPE	TABLE:								OFF
	UPRIGHT:								ON

DIP SWITCH 2:

ITEM	ACTION	1	2	3	4	5	6	7	8
NUMBER	THREE:	OFF	OFF						
OF	FIVE:	ON	OFF						
LIVES	ONE:	OFF	ON						
	INFINITE:	ON	ON						
LEVEL	NORMAL:			OFF	OFF				
OF	EASY:			ON	OFF				
DIFFICULTY	HARD:			OFF	ON				
	HARDEST:			ON	ON				
BONUS LIVE	40,000PTS:					OFF	OFF		
AWARDED	60,000PTS:					ON	ON		
EVERY:	90,000PTS:					OFF	ON		
	50,000PTS ONLY:					ON	ON		
NOT USED	LEAVE OFF :							OFF	
CONTINUE	YES:								OFF
MODE	NO:								ON

3. TECHNICAL INFORMATION

A. PCB Edge Connector Pin-Out.

The DE-0301 uses a 56 pin 'JAMMA' standard Edge Connector. The PCB edge connector pin-out is shown in figure 2 below.

WIRE COLOR	SOLDER SIDE	PIN #	PIN #	PARTS SIDE	WIRE COLOR
BK	GROUND	A1	B1	GROUND	BK
BK	GROUND	A2	B2	GROUND	BK
